Capital Raising Presentation
April 2019

An Australian Zinc and Precious Metals Development Company
Investor Presentation Disclaimer

- This presentation contains a summary of information of the PNX Metals Limited ("PNX" or "the Company") and is dated 18 April 2019 ("Investor Presentation"). The Investor Presentation has been prepared by the Company in relation to the proposed rights issue of fully paid ordinary shares in the Company ("Rights Issue").

Confidential Information

- The information in this Investor Presentation is confidential. You must not copy or circulate it, in whole or in part, to any person unless they are within your organization in Australia and are directly involved in your consideration of the Rights Issue.
- This Investor Presentation (including any copy of it) may not be transmitted outside Australia or distributed, directly or indirectly, outside Australia. In particular it may not be transmitted in the United States or distributed, directly or indirectly, to any US Person (as defined under Regulation S under the US Securities Act of 1933 as amended (US Securities Act). It does not constitute an offer to sell, or solicitation of an offer to buy, or an invitation to subscribe for or buy securities in the United States or to any US person, and is not available to persons in the United States or US persons. By accepting this Investor Presentation you represent and warrant that you are not a US Person or other foreign person and not acting on account of a US person. The Shares have not been, and will not be, registered under the US Securities Act or the securities laws of any states of the United States. Certain institutional investors in New Zealand, Hong Kong, Singapore and the United Kingdom may be eligible to participate in the Rights Issue provided that any such investor warrants and represents by opening this Investor Presentation that they have met the relevant investment exemptions in any such jurisdiction.

No Liability

- This Investor Presentation has been prepared based on information available to it at the time of preparation and from sources believed to be reliable. the Company makes no representation that it has verified the information. No representation or warranty is made that the information in this presentation is complete or comprehensive and does not purport to summarise all information relevant to the Company. It should be read in conjunction with the Company’s other periodic and continuous disclosure announcements and you should conduct your own analysis in order to satisfy yourself as to the accuracy and completeness of the information, statements and opinions contained in this presentation before making any investment decision.
- This Investor Presentation is not a disclosure document and should not be considered as an offer or invitation to subscribe for, or purchase any securities in the Company or as an inducement to make an offer or invitation with respect to those securities.
- The information contained in the Investor Presentation is general information only and it is not intended to be a recommendation by the Company, Hartleys Limited (Hartleys) or any of their officers, employees, associated or advisors to invest in the shares. The Investor Presentation must not be relied upon or construed as advice to investors or potential investors and has been prepared without taking into account the recipient’s investment objectives, financial circumstances or particular needs. Those individual objectives, circumstances and needs should be considered, with professional advice, when deciding whether an investment is appropriate.
- To the maximum extent permitted by law, the Company, Hartleys and each of its respective beneficiaries exclude and disclaim all liability, including without limitation for negligence or for any expenses, losses, damages or costs incurred by you as a result of your participation in the Rights Issue or the information in this presentation being inaccurate or incomplete in any way for any reason, whether by negligence or otherwise. To the maximum extent permitted by law, Hartleys and each of its beneficiaries take no responsibility for any part of this presentation or the Rights Issue. Hartleys and each of its beneficiaries make no recommendation as to whether you or your related parties should participate in the Rights Issue nor do they make any representations or warranties to you concerning the Rights Issue, and you represent, warrant and agree that you have not relied on any statements made by Hartleys or any of its beneficiaries in relation to the Rights Issue and you further expressly disclaim that you are in a fiduciary relationship with any of them.
- None of the Company, Hartleys or their advisors or associates guarantee the success, repayment of capital or any rate of return on income or investment performance of the shares.

No Obligation to Update

- You cannot assume that the Investor Presentation will be updated at any time subsequent to the date of the Investor Presentation. Except to the extent provided by law, the Company and Hartleys do not undertake to advise any person of any information coming to their attention relating to the financial condition, status or affairs of the Company or its related bodies corporate.
- All references to dollars, cents or $ in this presentation are to Australian currency, unless otherwise stated. References to “the Company”, “the Company”, or “the Group” may be references to the PNX Metals Limited or its subsidiaries.
Disclaimer & Important Notes

Competent Person’s Statement

• This presentation is an overview of the Company prepared with good intention. It is not a prospectus and offers no securities for subscription or sale in any jurisdiction, nor a securities recommendation.
• Not all information necessary for investment decisions is contained herein and investors are encouraged to conduct their own research and analysis of PNX Metals Limited in conjunction with legal, tax, business and financial consultation before making financial investments.
• PNX Metals Limited, its directors, officers, employees and agents disclaim liability to the maximum extent permitted by law for any loss or damage suffered by reliance on information contained in this presentation when making investment decisions. In addition, no express or implied representation or warranty is given in relation to the completeness and sufficiency of the information, opinions or beliefs contained in this document or any other written or oral information made or to be made available to any interested party or its advisors. To the maximum extent permitted by law, no liability is accepted for any loss, cost or damage suffered or incurred by the reliance on the sufficiency or completeness of the information, opinions or beliefs contained in this presentation.
• The Hayes Creek Project ("Project") production target and the forecast financial information and income-based valuation derived from the production targets reported in this document are based on Mineral Resources which are classified as 98% Indicated and 2% Inferred. There is a low level of geological confidence associated with Inferred Mineral Resources, and there is no certainty that further exploration work will result in their conversion to Indicated Mineral Resources, or that the production targets themselves will be realised. The Company is however satisfied that the use of 2% Inferred Mineral Resources in the production targets is not the determining factor in the overall viability of the Project and that it is reasonable to include this 2% Inferred Mineral Resources component. The Company cautions that there is no certainty that the production targets or the forecast financial information and income-based valuation derived from the production targets will be realised.
• This document contains ‘forward-looking statements’ that are based on the Company’s expectations, estimates and projections as of the date on which the statements were made. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, level of activity, performance or achievements to be materially different from those expressed or implied by the forward-looking statements.
• The Company believes there is a reasonable basis for the Project’s production targets and the forecast financial information and income-based valuation derived from those production targets provided in this document. In addition, the forward-looking statements are based on the Company’s belief that it has reasonable grounds to expect that funding will be secured to advance the Project through to the completion of a DFS and that the capital costs of the Project will be financed. There is no certainty, however, that sufficient funding will be raised by the Company when required.
• Refer to PNX’s ASX announcement 12 July 2017 regarding the Hayes Creek Pre-Feasibility Study (PFS) for detail on the material assumptions underlying the PFS, and for further information on the basis for forward-looking statements related to the Hayes Creek Project.
• The information in this report that relates to Mineral Resources and Exploration Results is based on information compiled by Mr Andrew Bennett a Competent Person who is a Member of the Australian Institute of Mining And Metallurgy. Mr Bennett has sufficient experience relevant to the style of mineralisation and the type of deposits under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves”. Mr Bennett is a consultant to the Company and consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

Forward Looking Statements

• This presentation contains forward looking statements. Such forward looking statements are not guarantees of future performance and are subject to known and unknown risk factors associated with the Company and its operations. While the Company considers the assumptions on which these statements are based to be reasonable, whether circumstances actually occur in accordance with these statements may be affected by a variety of factors. These include, but are not limited to, levels of actual demand, currency fluctuations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory developments, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates. These could cause actual trends or results to differ from the forward looking statements in this presentation. There can be no assurance that actual outcomes will not differ materially from these statements. You should not place undue reliance on forward looking statements and subject to any continuing obligation under applicable law, the Company disclaims any obligation or undertaking to disseminate any updates or revisions to any forward looking statements in this presentation to reflect any change in expectations in relation to any forward looking statements or any change in events, conditions or circumstances on which any statement is based.
Company Background

- PNX owns the Hayes Creek zinc-gold-silver Project in Northern Territory
- A 2017 PFS demonstrates the potential for a low-cost, high-margin Australian zinc and precious metals mine at Hayes Creek
  - Proposed +7 year mine-life with zinc/gold/silver in concentrates ~40kt ZnEq pa
  - Marketing & offtake discussions well advanced
- Successful near-mine and regional exploration in 2018
  - New gold discoveries and potential expansion of existing Mineral Resources
- New Mineral Resource estimate anticipated in May 2019

Capital Raising to Fund DFS

- Underwritten rights issue to raise $5.5m
- Funds to complete Hayes Creek definitive feasibility study (“DFS”), regulatory approvals, ongoing exploration and project development work
**Corporate Overview**

**A Junior Resources Company with Supportive Major Shareholders**

**Capital Structure**

Section 1

Details of the Rights Issue
## Capital Raising to Deliver DFS

**Underwritten Rights Issue, with offer for Sub-Underwriters to participate**

### Offer Structure
- Underwritten, non-renounceable pro-rata rights issue on the basis of three (3) new fully paid ordinary shares ("Shares") for every five (5) existing shares ("Rights Issue" or "Offer")
- Rights Issue will raise ~$5.48m (before costs) via the issue of approximately ~913m Shares
- Underwritten by Major shareholder DELPHI Unternehmensberatung Aktiengesellschaft ("Delphi") and Hartleys Limited ("Hartleys")

### Offer Price
- The Offer Price of 0.60 cents per Share, represents:
  - 3.6% discount to 30-day VWAP of 0.62 cents per share
  - 14.3% discount to last closing price of 0.70 cents per share
  - 9.4% discount to TERP\(^1\) based on last closing price of 0.70 cents per share

### Underwriting & Support from Shareholders
- PNX has received irrevocable undertakings from existing shareholders, including from substantial shareholder Sochrastem SAS, to apply for $850,000 in total of shares under the Rights issue Commitments
- Delphi has agreed to take up its rights and underwrite the balance of the Offer, excluding the Commitments, subject to the terms of the Delphi Underwriting Agreement

### Sub-underwriting Invitation Period
- PNX, through Hartleys, will invite eligible investors to participate in the capital raising by way of a sub-underwriting invitation period
- Delphi’s underwriting commitment will be reduced to the extent of allocations to sub-underwriters secured during the Invitation Period

### Use of Proceeds
- The proceeds of the Rights Issue will be used to fund the completion of a DFS at the Company’s Hayes Creek Project in the Northern Territory of Australia, as well as for related exploration and working capital

### Ranking
- Shares will rank equally with existing the Company current fully paid ordinary shares on issue

### Other Information
- Hartleys is appointed as Lead Manager
- Investors should have regard to the Offer Document once it is issued for further details of the Offer

---

1. The Theoretical Ex-Rights Price ("TERP") is the theoretical price at which PNX shares should trade after the ex-date for the Rights Issue. TERP is calculated by reference to PNX’s last closing share price of 0.70 cents per share, being the last trading day prior to entering a trading suspension on 16/04/19. TERP is a theoretical calculation only and the actual price at which PNX shares trade immediately after the ex-date of the Rights Issue will depend on many factors and may not be equal to the TERP.
Use of Funds

De-risking the completion of the Hayes Creek DFS

- PNX to progress the development of Hayes Creek with completion of a DFS. This includes:
  - Environmental and government approvals;
  - Project management, drilling and assays, technical studies;
  - Metallurgical testwork;
  - An options study for the Fountain Head project;
  - Project holding and management costs;
  - Ongoing greenfield exploration activities; and
  - Working capital and costs of the Rights Issue.

Section 2

PNX Project Overview
Regional Overview

Exciting gold & base metals opportunities emerging across the region

**Hayes Creek Project**
- High-Grade Zn-Au-Ag VMS deposits
- 4.1Mt @ 10.9% ZnEq *
- PFS completed, DFS underway

**Fountain Head**
- High grade gold system emerging
  - 6.0m @ 39.5 g/t from 54m¹
  - 6.7m @ 11.35 g/t Au from 201m
- Potential for expansion of existing open-pit

**Burnside Project**
- Cookies Corner discovery with >800m strike of gold mineralisation drilled²
- Open in all directions
- Numerous high-class Au deposits locally

**Moline Project**
- Historical mining centre 65km from Hayes Creek – resource potential ³
- Amenable to flotation co-feed for Hayes Creek – test work underway

---

¹See Appendix for further details on Hayes Creek Mineral Resources, ²See PNX ASX release 20 December 2018 ³See PNX ASX release 29 January 2019, ⁴See PNX ASX release 7 August 2018
PNX is targeting high-value, highly profitable deposits complementary to Hayes Creek. The Company is pursuing two work streams in parallel:

**Project Development Stream**

- DFS
- Construction
- Ops

Project development activities, focusing on continually upgrading the project and its economics.

**Exploration Stream**

Aggressive Near Mine & Regional Exploration

Aggressive near mine and regional exploration to unlock the significant potential of this VMS and gold district to provide additional feed to Hayes Creek.
Section 3

Hayes Creek Development Overview
Hayes Creek project overview

An Exceptional Mining Project

- **Strong Economics**
  - Revenues of $628 million over an initial 6.5 year LOM, NPV_{10\%} $133 million\(^1\)

- **Excellent Cash flow**
  - $41m estimated pre-tax net cash flow per annum ($266m LOM)

- **Rapid Payback**
  - Payback of capital in less than 15 months – exceptionally fast, low risk

- **Low Capital Hurdle**
  - Upfront capex of $58 million (includes processing facility and mine development)

- **Strong Production**
  - 18.3ktpa Zn, 14.7kozpa Au, and 1.4Mozpa Ag (~40ktpa ZnEq)\(^2\)

- **Infrastructure Access**
  - Located in existing infrastructure corridor with rail, gas, power and other mining operations, only 170km from Darwin

- **Exploration Potential**
  - Strong near-mine gold and base metal exploration potential, multiple drill targets

- **Commodity Outlook**
  - The supply and demand fundamentals for zinc remain strong, as does the price outlook for gold and silver

---

1 Refer ASX release of 12 July 2017 for full details of PFS. The material assumptions underpinning the production targets and the forecast financial information derived from the production targets continue to apply and have not materially changed. Revenues based on forward consensus commodity prices (US$) & FX rates: Zn $2,570, Au $1,289, Ag $19.4, Pb $2,129, Cu $6,366, US$0.73c

2 ZnEq = See notes relating to Mineral Resources in Appendix for metal equivalents definitions and assumptions
Hayes Creek DFS Underway

Two zinc-gold-silver rich VMS Deposits

- Open-pit mining at Mt Bonnie, then underground mining at Iron Blow
- 3Mt of high-grade (11.9% ZnEq) Mining Inventory of which 98% Indicated

- Mining areas sit on granted MLs, less than 3km apart
- MLs for process plant and tailing site at Fountain Head
- 15-20km along existing haul roads from mine location

- Proposed plant location at Fountain Head utilises historic open-pit for TSF, existing water, rail, gas, grid power, camp facilities
- Good access to markets and services
Hayes Creek Processing
Zinc concentrate + Precious Metals concentrate

- Plant designed around 450ktpa feed rate
- Planned location at historic Fountain Head, <20km north of mining area
- Process Flowsheet: Crushing, milling, flotation and tails
- Products: zinc concentrate + precious metals concentrate
- Estimated average annual production in concentrates of:
  - 18,300t zinc
  - 14,700oz gold
  - 1.4Moz silver
  - 3,300t lead/copper
- In-pit tails at Fountain Head, no requirement for tails dam construction
- Ongoing government and environmental approvals, and stakeholder engagement

Refer Hayes Creek PFS results (ASX release 12 July 2017) for further details of specific metallurgical test work
Test work identifies New Process Stream

Potential for material increase in Project gold and silver recoveries

- Innovative flotation and leaching test work on Iron Blow rougher tails
- New reagent targets residual gold and silver that would otherwise remain unrecoverable
- First pass improved recoveries to a scavenger concentrate by 26.6% gold and 19.9% silver
- Three well known hydrometallurgical processes then applied
  - intense cyanidation,
  - ferric oxidation, and
  - pressure oxidation
- Intense cyanidation achieves additional recoveries of precious metals of at least 10.7% gold and 17.0% silver to doré
- This equates to approximately 13koz Au and 1Moz silver over LoM at Iron Blow potentially creating a new revenue stream for the Project
- This test work will be advanced as part of the DFS and has the potential to increase the already robust economics of the Hayes Creek project as demonstrated by the 2017 PFS

*See ASX release 10 April 2019
Section 4

Exploration Potential
Fountain Head gold project

Exceptional gold grades, with scale potential

OVER 1.6km STRIKE EXTENT TO MINERALISATION

OPEN ALONG STRIKE UNTESTED HISTORIC GOLD WORKINGS

DIAMOND DRILLING UNDER HISTORIC MINING AREAS
Numerous near-surface mineralised intercepts

“The Fountain Head lodes are interpreted to represent the near-surface expression of a larger and previously overlooked gold system, which remains open”

Fountain Head gold project

Large scale gold system emerging

Fountain Head pit

Tally Ho pit

3m @ 11.1 g/t Au (FHRC062)

6.67m @ 11.35 g/t Au (FHRC077D)

Tally Ho lode extension 5m @ 3.96 g/t Au (FHRC076)

Tally Ho lode extension 1.0m @ 6.64 g/t Au

Tally Ho lode extension 1.0m at 4.93 g/t Au
2.49m at 1.21 g/t Au
4.81m at 1.11 g/t Au
0.69m at 1.61 g/t Au

Unmined mineralisation

200m
Fountain Head gold project

**New Mineral Resource Estimate due following successful recent drilling**

- NEW mineralisation drilled by PNX in 2018 being modelled, potential to significantly increase the size and scale of the deposit
- Optimisation shows opportunity for cutback from surface/deepening of Fountain Head and Tally Ho
- 80% of gold is contained in Tally Ho deposit and shell extends ~80m below the current mined out pit
- Resource modelling and new pit optimisation underway – due for completion May’19

*See ASX releases 20 December 2018, 19 September 2018, 22/23 August 2018, 1 August 2018, 23 July 2018 and 14 June 2018*
Burnside Exploration project
Large tenure with untested gold & base metals potential

- Birthplace of the NT gold rush in the 1870’s
- **Potential for:**
  - Multi-million ounce gold deposits (i.e. Callie style deposit, Cosmo Howley)
  - VMS i.e. Hayes Creek (4.1 Mt @ 11.9% ZnEq)
  - Woodcutters (historical production of 4.65 Mt @ 12.28% Zn, 5.6% Pb, 87g/t Ag)
- Gold and base metals prospectivity over a major ground holding – 1,550km²
- Pipeline of prospects ranging from newly identified geochemical and geophysical anomalies....
- ... to advanced exploration targets which are ready to drill and have economic grades and widths discovered in historical datasets
- Exploration success could extend Hayes Creek Project mine life – big incentive to fast-track discovery
Burnside Exploration project
Cookies Corner Gold Prospect Showing Extensive Mineralisation

- Drill targeted ~1km long 0.1g/t gold in soils anomaly associated with NE trending structures *
- Immediate exploration success – extensive gold mineralisation over a continuous 800m strike
- Near-surface mineralisation open in all directions
- High-impact, low cost drilling, all 24 holes drilled were successful, see diagram for results
- High-grade rock chips extend to the north, demonstrate the potential for strike extensions
- Opportunity for multiple deposits; numerous untested target areas in close proximity
- Same structural corridor as Kirkland Lake’s Cosmo Mine (>2Moz Au) & Pine Creek shear zone
- Comparable size and tenor to Goodall Mine (historic mined 330,000oz Au resource) <4km SW
- Follow-up planned during new exploration season (from May’19)
- Demonstrates significant untapped potential within large exploration tenure

*See ASX releases 29 January 2019, 14 November 2018, 9 October 2018
Moline Exploration project

Likely a Source of New Feed for Hayes Creek

- 100% owned granted MLs, only 65km from Hayes Creek *
- Numerous gold and base metal occurrences
- Large mineralised envelope with several km of strike over three parallel trends
- High-grade ‘shoots’ x-cutting the main mineralised zones in a N/S trend
- Opportunity to delineate additional feed for the Hayes Creek project
- Testwork highlights potential to generate a high-value concentrate through the proposed Hayes Creek process plant
  - Au-Zn-Pb well liberated at coarse grind
  - Additional flotation test-work to commence
- Mineralisation to be wire-framed and modelled for incorporation into resource estimates
- Focus will initially be on the near-surface potential open-pit zones
- Drilling has barely scratched the surface…

* See PNX ASX release 7 August 2018
Section 5

Risks & Restrictions
## Specific & Operational Risks

**Material risks that could adversely impact the business are summarised below**

<table>
<thead>
<tr>
<th>General</th>
<th>Any investment in the Company should be considered speculative because of the nature of the Company's business. Some of these risks can be mitigated by the use of safeguards and appropriate systems and controls, but some are outside the control of the Company and cannot be mitigated. Accordingly, an investment in the Company carries no guarantee with respect to the payment of dividends, return of capital or price at which Shares will trade.</th>
</tr>
</thead>
<tbody>
<tr>
<td>General Economic Climate</td>
<td>Factors such as inflation, currency fluctuation, interest rates, government policy and supply and demand have an impact on costs, commodity prices and stock market prices. The Company's future costs, projected project economics and the market price for its Shares may be affected by these factors, in particular by fluctuations in the prices for base and precious metals and currency rates, which are beyond the Company's control.</td>
</tr>
<tr>
<td>Operational and Project Development Risks</td>
<td>The business of mining and mineral exploration, development and production by its nature involves significant risks. Future profitability and current asset values can be affected by host of factors. The business depends on, amongst other things, successful exploration and delineation of mineral reserves, security of tenure, the availability of adequate funding, satisfactory performance of mining operations, weather conditions, availability and cost of consumables, plant and equipment and skilled labour when required, good industrial relations and competent management. Until the Company is able to realise value from its projects, it will incur ongoing operating losses. No assurances can be given that the Company will achieve commercial viability through the successful exploration and/or mining of its projects. It is noted that the Company's key project, the Hayes Creek zinc-gold-silver Project, is currently in the pre-feasibility stage but there is no assurance that the project will ultimately go ahead or be a commercial success. Some of the risks related to the development of the Hayes Creek Project include reduced metal recoveries and metallurgical difficulties, and increased capital costs. Other project development risks related to resource estimates, environmental matters, land access, and capital requirement are discussed in the sections below.</td>
</tr>
<tr>
<td>Mineral Resource Estimates</td>
<td>Mineral Resource Estimates are expressions of judgement based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Despite employing qualified professionals to prepare Mineral Resource Statements, such estimates may nevertheless prove to be inaccurate. Furthermore, MRE’s may change over time as new information becomes available and as the various price/cost inputs change. Should the Company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, MRE’s may need to be altered in a way that could adversely affect the Company's operations.</td>
</tr>
<tr>
<td>Requirements for Capital</td>
<td>The Company’s capital requirements depend on numerous factors including the outcome of and progress made under feasibility studies at the Hayes Creek Project, and the success of its regional exploration programs as well as opportunities for acquisitions or other corporate transactions. The Company anticipates that significant further capital will be required in order to develop the Hayes Creek Project. Any future equity capital raisings could result in dilution to existing shareholders.</td>
</tr>
<tr>
<td>Key Management</td>
<td>The Directors are primarily responsible for overseeing the operations and the strategic management of the Company. The day-to-day operations of the Company are the responsibility of the Managing Director, assisted by the Exploration Manager, Hayes Creek Project Manager, and CFO/Company Secretary. There can be no assurance that there will be no detrimental impact on the Company if one or more of the Directors and/or one or more members of senior management depart the Company.</td>
</tr>
<tr>
<td>Environmental Risks</td>
<td>The operations and proposed activities of the Company are subject to Australian Federal, South Australian and Northern Territory laws and regulations concerning the environment. All exploration projects and mining operations have an impact on the environment, particularly advanced exploration and mine development. The Company endeavours to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws. However, as with all exploration and mining activities, the Company’s operations are expected to have an impact on the environment. There are also risks inherent in the Company’s activities including accidental leakages, spills, or other unforeseen circumstances that could subject the Company to extensive liability. Further, the Company will require approval from the relevant authorities before undertaking activities that are likely to impact on the environment. If the Company fails to obtain such approvals it will be prevented from undertaking those activities. This is currently the case regarding the development of the Hayes Creek Project. PNX is currently involved in the process of preparing applications for and seeking the approvals that will be required for that Project. There is a risk that what may otherwise prove to be a financially viable project may not be developed or could be delayed because of the refusal of, or delay in obtaining, a necessary approval. The Company cannot predict what future legislation and regulations may govern mining, and which may impose significant environmental obligations on the Company.</td>
</tr>
</tbody>
</table>
## Specific & Operational Risks

**Material risks that could adversely impact the business are summarised below**

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Land Access</strong></td>
<td>There is a substantial level of regulation and restriction on the ability of exploration and mining companies to have access to land in Australia. Negotiations with both native title claimants and land owners/occupiers may be required before the Company can access land for exploration or mining activities. Inability to access, or delays experienced in accessing, the land may impact on the Company’s activities. It is noted that PNX holds tenure over granted Mineral Leases and has a landowner/occupier access agreement in place regarding access to the land on which the Hayes Creek Project is situated. Agreements will need to be arranged to ensure continued access to the relevant mining tenements and transportation corridors. Access to transportation corridors required for the development and operation of a mine at Hayes Creek may necessitate reaching agreement with the Northern Lands Council and/or native title claimants as well as land owners/occupiers.</td>
</tr>
<tr>
<td><strong>Government Policy</strong></td>
<td>Changes in government, monetary policy, taxation and laws (including those regulating the resources industry) can have a significant influence on the outlook for mineral exploration or development projects, companies and the return to investors. A change to State, Commonwealth, or Northern Territory government policies and legislation could have a material adverse effect on the Company or its projects.</td>
</tr>
<tr>
<td><strong>Joint Venture and Contractual Risk</strong></td>
<td>The Company is party to contractual arrangements with third parties. In particular, it is party to a joint venture agreement with Newmarket Gold NT Holdings Pty Ltd (‘Newmarket’), a wholly owned subsidiary of Kirkland Lake Limited relating to 1,550 m² of Northern Territory exploration tenure containing the Burnside, and Chessman exploration projects over which the Company holds a 90% interest. The Hayes Creek, Fountain Head and Moline projects are 100% owned by PNX. There are risks associated with the financial failure, or default of, or dispute with, any participant in a joint venture or contractual arrangement to which the Company is or may become party. If this occurs it could have a material adverse impact on the Company, its assets and/or its financial position. If a counterparty defaults in the performance of its obligations or wishes to enforce its rights, it may be necessary for the Company to seek or defend legal remedies including through a court action. Legal action can be costly and there can be no guarantee that a legal remedy would ultimately be granted to the Company on the appropriate terms (if at all).</td>
</tr>
</tbody>
</table>
Eligibility to participate in sub-underwriting

- This document does not constitute an offer of Shares.

- Expressions of interest to participate in the sub-underwriting of the Offer should be made to Angelo Gaudio at info@pnxmetals.com.au.

- To be eligible to participate, investors must be sophisticated or professional investors under section 708A(8) or 708A(11) of the Corporations Act.

- Offer documents, with full terms and conditions, will be sent to selected investors during the Sub-underwriting Invitation Period.

- Any shares offered pursuant to a Sub-underwriting Invitation will be offered in Australia only.

- This document may not be distributed to any person in any country outside Australia.

#### Notes relating to Tables 1, 2 & 3
Due to effects of rounding, the total may not represent the sum of all components.
Metallurgical recoveries and metal prices have been applied in calculating zinc equivalent (ZnEq) and gold equivalent (AuEq) grades.
Iron Blow - A mineralisation envelope was interpreted for each of the two main lodes, the East Lode (Zn-Au-Ag-Pb) and West Lode (Zn-Au), and four subsidiary lodes with a 1 g/t AuEq cut-off used to interpret and report these lodes.
Mt Bonnie - Zinc domains are reported above a cut-off grade of 1% Zn, gold domains are reported above a cut-off grade of 0.5 g/t Au and silver domains are reported above a cut-off grade of 50 g/t Ag.
In order to assess the potential value of the total suite of minerals of economic interest, formulae were developed to calculate metal equivalency for the gold and zinc (see below). Metal prices were derived from average consensus forecasts from external sources for the period 2017 through 2021 and are consistent with those used in PNX’s recently updated Mt Bonnie Mineral Resource Estimate.
Metallurgical recovery information was sourced from test work completed at the Iron Blow deposit, including historical test work. Mt Bonnie and Iron Blow have similar mineralogical characteristics and are a similar style of deposit. In PNX’s opinion all the metals used in the equivalence calculation have a reasonable potential to be recovered and sold.
PNX has chosen to report both the ZnEq and AuEq grades as although individually zinc is the dominant metal by value, the precious metals are the dominant group by value and will be recovered and sold separately to the zinc.
The formulae below were applied to the estimated constituents to derive the metal equivalent values:
Gold Equivalent (field = "AuEq") (g/t) = (Au grade (g/t) * (Au price per ounce/31.10348) + (Ag grade (g/t) * (Ag price per ounce/31.10348) + (Cu grade (%) * (Cu price per tonne/100) + (Pb grade (%) * (Pb price per tonne/100) + (Zn grade (%) * (Zn price per tonne/100) / (Au price per ounce/31.10348 * Au recovery)
Zinc Equivalent (field = "ZnEq") (%) = (Au grade (g/t) + (Ag grade (g/t) + (Cu grade (%) + (Pb grade (%) + (Zn grade (%) / (Zn price per tonne/100) + (Zn recovery) / (Zn price per tonne/100 * Zn recovery)
